

## Sales Force Automation (SFA)

Retail SFA process is an order based system which contains all the necessary information provided by the mobile based system like PDA. It includes all the information such as item details, price details, inventory details, auto converted to invoice/delivery information etc.

The function includes:

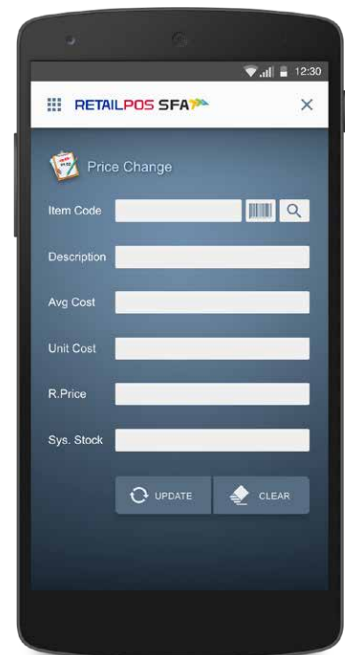

- Take sales order using hand held device (off-line)
- Sync and process the sales order in warehouse/HO
- No need of carrying stock with sales person
- Android & PDA Solutions
